Quality Assurance

Major outages have become so common with some providers that they are not even reported on the news. Recently I received a call from a charity where I support the IT - no internet, no phones. A remote attempt at debugging did not resolve anything but a quick look at down detector site showed a large increase in reports and a large 'blob' over the entire area.

Software testing and Quality Assurance continue to be critical in **Reducing Risk and addressing the above issues.**

To discuss your needs further, please [contact us](#).

[Schedule](#) a no-charge two hour consultation with senior Quality Assurance consultants for an initial assessment/problem solving session.

[Quality Assurance continues to be critical to resolving the above issues and getting the product and process correct the first time.](#)
