

Quality - What about Phase 2

Quality - Phase 2

Hi Testing Professional

Quality Assurance is continuous process Improvement. So what happens when you run to the end of your ideas. As one of the QA gurus put it at the very end of their book, get an almost (!) completely new team and start again.

Once you have no more ideas, it is time for someone else to take a look at the processes you improved and others you may not have considered and see if they can identify further areas for improvement. Obviously we do not want to reverse all the improvements that already occurred (that is best left to politicians who have the motto “When in doubt, change something so it looks like you are active”). This is why it is an “almost” completely new team. We need someone with institutional memory to have a record (beyond the written one) as to what was changed and why. They fill in all the undocumented statements that informed the reason for the previous change.

However, the aims do not change:

1. Smoother interaction with QA.
2. A more satisfied customer.
3. More and better business.
4. Better testing and QA.

National Software Testing and Quality Engineering Conference

The [National Software Testing and Quality Engineering Conference](#) is scheduled to take place on **May 26, 2026**, at the **Delta Marriott** in Downtown Toronto— 75 Lower Simcoe St, Toronto, ON M5J 3A6, Canada

This conference is specifically designed for experts in software testing, quality assurance, and quality engineering, and it aims to provide a thrilling new gathering tailored to their needs.

The field is currently experiencing a revolution with the introduction of AI, making this an ideal moment for professionals to take charge and stay ahead of the curve. By attending this one-day event in May, participants will have the opportunity to network with industry pioneers who are shaping the future, as well as leverage the power of AI through interactive workshops.

[For further details.](#)

Speakers are also welcome. The track sessions revolve around: AI in Testing, Tools/Tech, Strategy/Management, People/Processes. We are looking for end users.

Test Automation Summit is coming to Toronto | 5 June 2026

The future of testing is being shaped by AI, automation, and intelligent quality engineering—and Toronto is where the conversation happens next.

Test Automation Summit—Toronto brings together the testing and QA community for a powerful day of **learning, testing, and meaningful networking**.

Expect a full day featuring:

- ✓ 10+ expert talks, keynotes, tutorials, and panel discussions
- ✓ Real-world insights into AI-driven testing and automation
- ✓ Practical strategies to improve quality, speed, and reliability
- ✓ Opportunities to connect with QA leaders, engineers, and decision-makers

Whether you're a **QA leader, automation engineer, test architect, or DevOps professional**, this summit will give you the clarity and connections needed to stay ahead.

NVP Webinars

Each quarter we will be presenting a free webinar about the following topics:

1. AI in Test Leadership - March 26, 2026 - 12:00 - 1:00 Toronto Time [Register](#)
2. QA Basics and their application
3. AI in Test Leadership (Updated)
4. Canadian QA Initiative

Dates to follow in the next newsletter.

Quality Assurance continues to be critical to resolving the above issues and getting the product and process correct the first time..

Software Quality Assurance and Testing

Achieve your software quality goals and minimize your risk.

NVP's Software Testing and QA LinkedIn Group has over 217,000 members. If you are not a member yet, you can join [here](#).

Over 8k people are active every day and the group gets up to 140 new posts per day. All posts are curated. Posts are viewed by over 22k people a day with reactions and comments.

NVP's [Blog](#) is now available on the webpage.
